**Proposal Summary Information**

Middle and high school students in teams of no more than 4 are encouraged to submit a proposal that highlights "Future Mobility-2080." The competition focus areas are on innovations in autonomous driving, mechanical, digital and design, and other STEM areas. Student proposals should outline a project that moves them towards the vision of that future technology, and accepted student projects should demonstrate their process using STEM skills. Videos, photos and other material that demonstrate the key points of the project's process must be submitted as part of the entry. Teams will be disqualified for not having documentation of the project process.

You may submit a proposal that has been or will be submitted to other science competitions – as long as it's noted in the proposal and final project.

All presentation material and research submitted must be your own work. Plagiarism will not be tolerated. Any information that is not your own or is not common knowledge must be properly cited – which includes facts, techniques and information taken from the internet.

The Applications and Proposals will be reviewed for completeness and accuracy by a Selection Committee made up of Academicians, Metro Atlanta Public Schools Officials, STEM specialists, and Community Leaders.

**Proposal Deadline**

Please send proposals by the deadline of **November 1, 2017 at 8:00 pm Eastern Time.**
